

# OneGloss M

MOUNTED

One-step Finisher and Polisher  
for Composite

# Finishing and polishing with

One-step OneGloss M silicone polishers contain aluminium oxide and provide the ideal finish for all types of composite restorations simply by altering the contact pressure, as you go from finishing to polishing.

- OneGloss M polishers are mounted on stainless steel CA mandrels and are sterilisable
- Finishing is done with heavy contact pressure (approx. 1.0 N)
- Polishing is done with feather light contact pressure (approx. 0.3 N)
- Removal of excess composite or cement and polishing of enamel with moderate to feather light contact pressure
- Polishing of enamel after orthodontic debonding, after scaling or for the removal of tooth discolouration with feather light contact pressure
- Recommended speed range  $3,000 \text{ min}^{-1}$  -  $10,000 \text{ min}^{-1}$  with intermittent water spray; maximum permissible speed of  $15,000 \text{ min}^{-1}$  must not be exceeded

# one instrument

## Shape selection

The product line includes four shapes which are optimally matched to the surfaces to be treated.

### Cup

for cusp, incisal and occlusal

### Midpoint

for labial, lingual, buccal, occlusal

### Minipoint

for fissures, cervical

### IC

for labial, lingual, buccal, interproximal

# Order Information

## OneGloss M

with CA mandrel, 12 pcs. per box

Shape: Minipoint

PN 0186

Shape: Cup

PN 0187

Shape: Midpoint

PN 0188

Shape: IC

PN 0189
